Art Unit: 3727

1. Claim 12 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original disclosure does not support the single fold line at one end. Note that the multiple layers would form multiple fold lines at portion 11. This is a new matter rejection.

2. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

“shorter edge” is confusing, i.e. shorter than what?

3. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Wieland (601922). Wieland teaches a folding pocket wallet having a single fold line (between panels g in Fig. 3), two edges (one at f and the other shorter edge at portion c in Fig. 1), one end opposite the fold line (at b), the shorter edge having substantially round tapering (at h) where it joins the end similar to that of applicant's. With respect to the wallet obviates spinal misalignment, note that it is an intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Giard in view of either Gomi (1972480) or Christiansen (4332338). Giard teaches a pocket wallet having a unfolded configuration (Fig. 6) is substantially shaped as an isosceles trapezoid with two

diagonal legs convexly rounded at 50 and 60, with the longest edge 40, a shorter two opposing ends, two convexly rounded edges. Giard meets all claimed limitations except for the fold line. Either Gomi or Christiansen teaches that it is known in the art to provide a fold line for a wrist wallet (see Figs. 3 and 1 respectively). It would have been obvious to one of ordinary skill in the art to provide a fold line in Giard as taught by Either Gomi or Christiansen to enable one to put in the pocket easily.

5. Claims 14-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
